

Content Management and Portals for H-Sphere

Last Updated Tuesday, 05 February 2008

Contains Pre-install Content Management and Portal Applications for the Hosting Automation Software H-Sphere (EasyApp).

The following Applications are included in our EasyApp package:

-
Joomla 1.0.x and Joomla 1.5.x

- Joomla! is a Content Management System (CMS) created by the same award-winning team that brought the Mambo CMS to its current state of stardom.

-
Joomla! is a production of Open Source Matters, the same team that brought you the award winning Mambo Content Management System. OSM has taken their final stable version of Mambo (4.5.2.3), given it a spring clean and named it Joomla! 1.0 In addition, several small features that were going to be released in Joomla! 1.1 have been brought forward and included in this release.

The following outlines the highlights of this debut version of Joomla! All comments are made in reference to Mambo 4.5.2.3 with regard to changes and improvements made.

-
phpWebSite

- phpWebSite provides a complete web site content management system. Web-based administration allows for easy maintenance of interactive, community-driven web sites.

phpWebSite's growing number of modules allow for easy site customization without the need for unwanted or unused features. Client output from phpWebSite is valid XHTML 1.0 and meets the W3C's Web Accessibility Initiative requirements.

Founded and hosted by the Web Technology Group at Appalachian State University, phpWebSite is developed by the phpWebSite Development Team, a network of developers from around the world. phpWebSite is free, open source software and is licensed under the GNU GPL and GNU LGPL.

-
eZ Publish

-
