

July 2009 - E-Com and Blog updates

We have upgraded Magento to version 1.3.2.2 and also applied some small security patches to ZenCart. On the Blog front our installer now uses Wordpress 2.8.

As usual, please download the EasyApp package and upgrade it on your CP Server.

Our installers will work on H-Sphere 3.1, 3.2 and 3.3 Unix Servers without problems.
